Calling Captain Vacuum! You have to stop Dr. NoVac! He's sabotaging the outer space turbo-vacuum pump plant.

Mission possible, Commander! Dr. NoVac will soon have taken his last breath. I have what it takes to save all the vacuum! I'm always ready, willing and able when the Void needs me!

That scoundrel wants to repeal the laws of nature and seize power. You've got to cut off his air!

May the Void be with you!

Later, at the outer space vacuum plant.

Ha ha, I've defeated the vacuum! Air for my empire!

Gasp ... Captain Vacuum?!

This will keep the air outside, Dr. NoVac ... and keep the vacuum where it's needed!

Dr. NoVac drifts vacuumized in space; the Captain is victorious. Now he sets about stabilizing the vacuum in outer space. His special vacuum belt has everything he needs to get the plant running again.

TO BE CONTINUED ...

## The experts for perfect vacuum.

Over the course of the company's more than 100-year history of innovation, we have been driven by a quest to transform nothing into perfection. Custom-tailored solutions for your processes and the durability of our products make for secure investments. Pfeiffer Vacuum, the inventor of the turbomolecular pump – your strong partner for all applications.

As a leading manufacturer of components and systems for generating, measuring and analyzing vacuum, Pfeiffer Vacuum is your guarantee of quality, reliability and service. Our worldwide 24/7 service organization is unrivaled in being able to perform bearing changes right on site. Short downtimes – an unbeatable advantage when it comes to efficiency and cost-effectiveness.
