## Fascinating!

The fascination of speed. The rotor in a turbopump sets the pace – at 1.4 times the speed of sound. Enabling the very heart of a complex vacuum solution to generate vacuums of up to  $10^{-12}$  mbar. The same as in outer space! To the delight of scientists and researchers. Because our people's hearts, commitment and skills go into each and every pump.

Pfeiffer Vacuum stands for innovative and custom vacuum solutions worldwide. For German engineering art, competent advice and reliable service. Ever since the invention of the turbopump, we've been setting standards in our industry. And this claim to leadership will continue to drive us in the future.
